Banca Mediolanum's FY25 results are set to show a record year, supported by structural inflow growth, resilient profitability and growing shareholder remuneration. All in all, strong year-end inflows and meaningful upside from performance fees are translating into greater visibility on earnings and improved dividend expectations. We believe the upcoming 4Q25/FY25 results will act as a catalyst for consensus upgrades, reinforcing Mediolanum's positioning as a high-quality compounder within the Italian asset-gathering sector.

- **4Q25 results due out on 3 February 2026.** We expect results to confirm a very strong end to the year, driven by performance fees and strong inflows:
  - **Net commission income** expected at **€333mn (+13% YoY)**, supported by higher management fees (€378mn, +11% YoY) and strong banking services activity;
  - **NII** projected at **€223mn (+13% YoY)**, confirming resilience and full delivery of the upgraded FY25 guidance (flat YoY);
  - **Performance fees** expected at **€193mn in 4Q25**, bringing FY25 to **~€256mn**, well above previous assumptions;
  - **Net profit** forecast at **€452mn**, significantly above consensus, backed by higher performance fees and ~€100mn of positive one-offs related to the favourable resolution on the tax treatment of dividends from foreign subsidiaries.
- **Strong 4Q inflows round off a record FY25. Mix remains highly accretive.** Inflows accelerated in 4Q25, with total inflows of €3.48bn, including €2.47bn into AuM. FY25 closed with €9.06bn of inflows to AuM (+18% YoY) and total inflows of €11.64bn, well above guidance (€8-8.5bn for AuM inflows). Managed assets accounted for ~78% of total inflows, supporting visibility on recurring fees and margin quality. Looking ahead, we are raising our FY26 inflow estimate to €11.1bn, driven by higher expectations for AuM inflows (€8.2bn).
- **Change in estimates: FY25 EPS upgraded. Dividend upside reinforced.** We are raising our FY25 net profit estimate to €1.18bn (+16%), driven by higher performance fees and positive one-offs, while leaving FY26-27 estimates broadly unchanged. We are upgrading our FY25 DPS to €1.20 (vs. €1.10 previously), implying c.15% upside vs. current consensus, while maintaining FY26/27 DPS at €0.88/€0.92, consistent with a growing base dividend supported by strong capital generation.
- **OUTPERFORM confirmed; target raised to €22.0 (from €21.5).** We are raising our target price to €22.0, implying a P/E of 13.9x FY25, 16.6x FY26 and 16.0x FY27, which we view as justified by improved earnings visibility, superior inflow trends and enhanced dividend capacity. Despite the strong share price performance over the past year, we believe the re-rating is not over, as consensus has yet to fully factor in the upside from performance fees and the strengthening of shareholder returns.

#### GUIDE TO FUNDAMENTAL RESEARCH

The main methods used to evaluate financial instruments and set a target price for 12 months after the investment recommendation are as follows:

- Discounted cash flow (DCF) model or similar methods such as a dividend discount model (DDM)
- Comparison with market peers, using the most appropriate methods for the individual company analysed: among the main ratios used for industrial sectors are price/ earnings (P/E), EV/EBITDA, EV/EBIT, price /sales
- Return on capital and multiples of adjusted net book value are the main methods used for banking sector stocks, while for insurance sector stocks return on allocated capital and multiples on net book value and embedded portfolio value are used
- For the utilities sector comparisons are made between expected returns and the return on the regulatory asset base (RAB)

Some of the parameters used in evaluations, such as the risk-free rate and risk premium, are the same for all companies covered, and are updated to reflect market conditions. Currently a risk-free rate of 4.0% and a risk premium between 5.5% - 6.0% are being used.

Frequency of research: quarterly.

Reports on all companies listed on the FTSEMIB40 Index, most of those on the MIDEX Index and the main small caps (regular coverage) are published at least once per quarter to comment on results and important newsflow.

A draft copy of each report may be sent to the subject company for its information (without target price and/or recommendations), but unless expressly stated in the text of the report, no changes are made before it is published.
