2025 has been a peculiar year for Banco BPM: it has completed a tender offer on Anima, is set to improve its top line in a more diversified way, and has been subject to a tender offer from UCG that did not come to fruition.

Looking at 3Q25 results, they came in higher than expected, driven by organic growth and provisions. The CET1 ratio came in at 13.5%, guidance was confirmed (FY25 net profit was ~€1.95bn) as was the interim DPS (€0.46). We expect Anima to continue to contribute significantly to BAMI's results, thanks to the growth in AuM and a potential distribution agreement with another bank.

On a fundamental basis, however, BAMI (+ Anima) seems fairly valued at current prices, as in our view it has now incorporated the accretion deriving from the Anima acquisition. We are therefore downgrading the stock to NEUTRAL, while raising our TP to €12.4, due to the tweaks to our estimates and a 50bp reduction in the risk-free rate.

■ **3Q25 results** exceeded expectations, by ~7% for operating profit and even more on the bottom line, driven by lower provisions. The top line was driven by higher-than-expected NII, thanks to selective lending and effective spread management, as well as stronger fee income, supported by Anima, and solid contributions from insurance and equity-accounted entities. Operating expenses were lower than anticipated across both staff and administrative lines, lifting operating profit above forecasts. Below the operating line, significantly lower provisions and some positive write-backs contributed to the better results. Net profit was 16.3% above estimates, and the CET1 ratio came in at 13.52%, 15bp better than expected, benefiting from higher profitability, DTAs, and FVOCI reserves.

■ **Change in estimates:** we are revising our estimates following the results release, with only minor adjustments to the P&L mix. We are trimming 2026 and 2027 NII forecasts, leading to the top line coming down by -1% and -0.6% respectively, while other revenue items remain unchanged. We are raising D&A slightly for the same years. Below the operating line, the only notable change is a higher assumed tax rate of 30%, resulting in a -2.2% reduction in operating profit for 2026 and -1.5% for 2027. We are lowering adjusted net profit by -1.0%/-2.7%/-2.1% for FY25/26/27.

■ **Feedback from conference call:** during the conference call, management struck a positive tone on NII, which is foreseen stable as the spread seems to have reached its lowest point, and on the expected fee growth driven by Anima and Insurance. Management also said that BAMI has optionality on the Anima minorities, as it may like other potential distributors to take a stake in the company.

■ **Valuation:** we value Banco BPM with a GGM implied P/TE multiple, averaging the FY26/27 fair values, without incorporating any M&A premium. Given the change in estimates, and the 50bp cut in the risk-free rate, we are raising our target price to €12.4, while downgrading the stock to NEUTRAL, as we prefer other names which can enjoy higher re-ratings (BPER and BMPS). The stock is trading at 1.52/1.49/1.46x its TE, at target it would trade at 1.49/1.47/1.44x.

ANALYST CERTIFICATION

For each company mentioned in this report the respective research analyst hereby certifies that all of the views expressed in this research report accurately reflect the analyst's personal views about any or all of the subject issuer (s) or securities. The analyst (s) also certify that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation or view in this report.

The analyst (s) responsible for preparing this research report receive(s) compensation that is based upon various factors, including Intermonte's total profits, a portion of which is generated by Intermonte's corporate finance activities, although this is minimal in comparison to that generated by brokerage activities. Intermonte's internal procedures and codes of conduct are aimed to ensure the impartiality of its financial analysts. The exchange of information between the Corporate Finance sector and the Research Department is prohibited, as is the exchange of information between the latter and the proprietary equity desk in order to prevent conflicts of interest when recommendations are made.

The analyst responsible for the report is not a) a resident of US; b) an associated person of a U.S. broker-dealer; c) supervised by a supervisory principal of a U.S. broker-dealer. This Research Report is distributed in the U.S. through Plural Securities LLC, 950 3rd Avenue, Suite 1702, NY 10022, USA.

GUIDE TO FUNDAMENTAL RESEARCH

The main methods used to evaluate financial instruments and set a target price for 12 months after the investment recommendation are as follows:

- Discounted cash flow (DCF) model or similar methods such as a dividend discount model (DDM)
- Comparison with market peers, using the most appropriate methods for the individual company analysed: among the main ratios used for industrial sectors are price/ earnings (P/E), EV/EBITDA, EV/EBIT, price /sales
- Return on capital and multiples of adjusted net book value are the main methods used for banking sector stocks, while for insurance sector stocks return on allocated capital and multiples on net book value and embedded portfolio value are used
- For the utilities sector comparisons are made between expected returns and the return on the regulatory asset base (RAB)

Some of the parameters used in evaluations, such as the risk-free rate and risk premium, are the same for all companies covered, and are updated to reflect market conditions. Currently a risk-free rate of 4.0% and a risk premium between 5.5% - 6.0% are being used.

Frequency of research: quarterly.

Reports on all companies listed on the FTSEMIB40 Index, most of those on the MIDEX Index and the main small caps (regular coverage) are published at least once per quarter to comment on results and important newsflow.

A draft copy of each report may be sent to the subject company for its information (without target price and/or recommendations), but unless expressly stated in the text of the report, no changes are made before it is published.

Explanation of our ratings system:

BUY: stock expected to outperform the market by over 25% over a 12 month period;

OUTPERFORM: stock expected to outperform the market by between 10% and 25% over a 12 month period;

NEUTRAL: stock performance expected at between +10% and - 10% compared to the market over a 12 month period;

UNDERPERFORM: stock expected to underperform the market by between -10% and -25% over a 12 month period;

SELL: stock expected to underperform the market by over 25% over a 12 month period.

Prices: The prices reported in the research refer to the price at the close of the previous day of trading

CURRENT INVESTMENT RESEARCH RATING DISTRIBUTIONS

Intermonte SIM is authorised by CONSOB to provide investment services and is listed at n° 246 in the register of brokerage firms.

As at 7 November 2025 Intermonte's Research Department covered 131 companies. Intermonte's distribution of stock ratings is as follows:

BUY:	32.06%
