In a context of lower oil and gas prices, ENI reported better-than-expected figures, thanks primarily to a solid operational performance in the E&P segment. In terms of outlook for 2026, oil and gas production growth is expected to be consistent with the 2025-28 Plan guidance (2-3% CAGR); gross CapEx is expected to be Eu7bn, well below the Eu8.5bn recorded in 2025. We have updated our projections primarily to reflect slightly higher oil price assumptions and lower CapEx. Target price increased to Eu19.0ps. Focus on the new 2026-29 business plan (on 19 March). After the recent strong share price performance, we remain NEUTRAL.

- 4Q25 results.** Amid lower oil and gas prices, ENI reported better-than-expected figures, thanks primarily to a solid operational performance in the E&P segment. In detail: proforma EBIT closed at Eu2,893mn (-3% QoQ, +7% YoY, vs. exp. Eu2,449mn), adj. EBIT at Eu1,782mn (-14% QoQ, +5% YoY, vs. exp. Eu1,601mn), and adj. net income at Eu1,196mn (-4% QoQ, +34% YoY, vs. exp. Eu804mn). Moving to the balance sheet, net debt closed at Eu15.1bn (D/E 0.29x, 0.18x pre IFRS16, vs. exp. Eu14.5bn), slightly lower QoQ. CFFO before working capital closed at Eu3.0bn (vs. Eu3.3bn in 3Q25, exp. Eu2.8bn).
- Divisional highlights.** E&P reported output of 1,839kboed (+5% QoQ, +7% YoY), with adj. EBIT at Eu1,804mn (flat QoQ and YoY, vs. exp. Eu1,610mn); GGP & Power reported adj. EBIT of Eu179mn (-48% QoQ, -34% YoY, vs. exp. Eu223mn); Enilive & Plenitude Eu289mn (+112% YoY, vs. exp. Eu185mn); Refining & Chemicals Eu-204mn (vs. Eu-136mn in 3Q25 and Eu-291mn in 4Q24, vs. exp. Eu-195mn).
- 2026 outlook.** In terms of outlook for 2026, ENI said oil and gas production growth is expected to be consistent with the 2025-28 Plan guidance (2-3% CAGR); gross CapEx is expected to be Eu7bn; net CapEx around Eu5bn; gearing is expected to be between 10-15% (assuming Brent price at US\$62/bl).
- New 2026-29 business plan (on 19 March).** In terms of operational and financial targets, we expect confirmation of a 2-3% E&P production CAGR, while we expect the cumulative 4YP CFFO target (Eu60bn in last year's plan) to be reduced, bearing in mind that ENI's oil and gas price assumptions last year were significantly above current forwards, with a stronger dollar. In response to a weaker macro scenario, we expect gross CapEx to be cut (cumulative Eu33bn in last year's business plan), with ENI already anticipating Eu7.0bn for 2026, well below the Eu8.5bn recorded in 2025. In terms of the shareholder remuneration policy, we expect confirmation of the distribution of 30-35% of annual CFFO via a combination of dividends (we project a Eu1.08 DPS for 2026) and share buybacks (we now assume Eu1.2bn in 2026 vs. Eu1.8bn in 2025).
- Updated estimates and valuation.** We have updated our projections primarily to reflect slightly higher Brent oil price assumptions (2026 US\$65.0/bl, 2027 onwards US\$67.5/bl) and lower CapEx. Regarding the valuation, we are increasing our target price to Eu19.0ps from Eu17.0ps, still based on DCF, SOP and market multiples.

GUIDE TO FUNDAMENTAL RESEARCH

The main methods used to evaluate financial instruments and set a target price for 12 months after the investment recommendation are as follows:

- Discounted cash flow (DCF) model or similar methods such as a dividend discount model (DDM)
- Comparison with market peers, using the most appropriate methods for the individual company analysed: among the main ratios used for industrial sectors are price/ earnings (P/E), EV/EBITDA, EV/EBIT, price /sales
- Return on capital and multiples of adjusted net book value are the main methods used for banking sector stocks, while for insurance sector stocks return on allocated capital and multiples on net book value and embedded portfolio value are used
- For the utilities sector comparisons are made between expected returns and the return on the regulatory asset base (RAB)

Some of the parameters used in evaluations, such as the risk-free rate and risk premium, are the same for all companies covered, and are updated to reflect market conditions. Currently a risk-free rate of 4.0% and a risk premium between 5.5% - 6.0% are being used.

Frequency of research: quarterly.

Reports on all companies listed on the FTSEMIB40 Index, most of those on the MIDEX Index and the main small caps (regular coverage) are published at least once per quarter to comment on results and important newsflow.

A draft copy of each report may be sent to the subject company for its information (without target price and/or recommendations), but unless expressly stated in the text of the report, no changes are made before it is published.
