■ **1Q24 results due out on 7 May 2024.** We expect the 1Q top line to have continued to benefit from a favourable YoY comparison in terms of NII while we expect a flattish trend vs 4Q23. Positive contribution expected from commissions thanks to an increase in investing fees. Bottom line YoY growth will be impacted by higher operating costs, mostly from the greater impact of provisions for the bank deposit guarantee scheme, which for FY24 will be entirely set aside in 1Q. Excluding this, adj. net profit is expected higher YoY. In detail:

- NII expected at €177mn; +13% YoY / -1% QoQ. Growth is expected to gradually slow from the extraordinary +75% YoY posted in FY23, penalised by outflows from deposits and by a progressively less favourable YoY comparison.
- Net fees foreseen at €127mn; +5% YoY / flat QoQ, with a higher contribution from investing and a flattish trend in brokerage fees offsetting a slightly decline in banking commissions.
- Trading profit at €17mn; +10% YoY / +19% QoQ, thanks to increasing volumes.
- Operating costs at €82mn; +12% YoY / flat QoQ with the cost/income ratio at 25.6% vs. 25% in 1Q23.
- Provisions for the bank deposit guarantee scheme expected at €41mn vs. €10mn in 1Q23 with the entire FY24 contribution expected to be set aside in 1Q24.
- Adj. net profit (excl. the impact of provisions for the bank deposit guarantee scheme) expected at €163.8mn, +11.2% YoY / +5.7% QoQ.

■ **Very slow improvement in the net inflow mix trend.** 1Q24 net inflows to managed assets came to €469mn (-55% YoY). As at the end of 1Q24, the stock of AuM reached €60.4bn with a positive market effect (+~3.3%). AuC inflows at €2.5bn (-14% YoY) also thanks to ~€700mn related to BTP Valore in March. 1Q24 deposit outflows at €767mn (vs €1.2bn in 1Q23). The data confirm that competition from direct investments in fixed income remains, as clients continued to show a clear preference for administered over managed assets, especially in specific events like government retail bond issues. In terms of inflows, we broadly confirm our expectations (AuM inflows at €3.1bn and AuC inflows at €7.8bn).

■ **NEUTRAL confirmed; €14.5.** We remain NEUTRAL on the stock ahead of 1Q24 results awaiting evidence of a more sustained trend inversion in the net inflow mix. FBK trades at ~14x earnings.

**IMPORTANT DISCLOSURES**

The reproduction of the information, recommendations and research produced by Intermonte SIM contained herein and of any its parts is strictly prohibited. None of the contents of this document may be shared with third parties without authorisation from Intermonte.

This report is directed exclusively at market professional and other institutional investors (Institutions) and is not for distribution to person other than "Institution" ("Non-institution"), who should not rely on this material. Moreover, any investment or service to which this report may relate will not be made available to Non-Institution.

The information and data in this report have been obtained from sources which we believe to be reliable, although the accuracy of these cannot be guaranteed by Intermonte. In the event that there be any doubt as to their reliability, this will be clearly indicated. The main purpose of the report is to offer up-to-date and accurate information in accordance with regulations in force covering "recommendations" and is not intended nor should it be construed as a solicitation to buy or sell securities.

This disclaimer is constantly updated on Intermonte's website [www.intermonte.it](http://www.intermonte.it) under LEGAL INFORMATION. Valuations and recommendations can be found in the text of the most recent research and/or reports on the companies in question. For a list of all recommendations made by Intermonte on any financial instrument or issuer in the last twelve months consult the [PERFORMANCE](#) web page.

Intermonte distributes research and engages in other approved activities with respect to Major U.S. Institutional Investors ("Majors") and other Qualified Institutional Buyers ("QIBs"), in the United States, via Brasil Plural Securities LLC under SEC 15a-6 guidelines. Intermonte is not registered as a broker dealer in the United States under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and is not a member of the Securities Investor Protection Corporation ("SIPC"). Brasil Plural Securities LLC is registered as a broker-dealer under the Exchange Act and is a member of SIPC.

**ANALYST CERTIFICATION**

For each company mentioned in this report the respective research analyst hereby certifies that all of the views expressed in this research report accurately reflect the analyst's personal views about any or all of the subject issuer (s) or securities. The analyst (s) also certifies that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation or view in this report.

The analyst (s) responsible for preparing this research report receive(s) compensation that is based upon various factors, including Intermonte's total profits, a portion of which is generated by Intermonte's corporate finance activities, although this is minimal in comparison to that generated by brokerage activities.

Intermonte's internal procedures and codes of conduct are aimed to ensure the impartiality of its financial analysts. The exchange of information between the Corporate Finance sector and the Research Department is prohibited, as is the exchange of information between the latter and the proprietary equity desk in order to prevent conflicts of interest when recommendations are made.

The analyst responsible for the report is not a) a resident of US; b) an associated person of a U.S. broker-dealer; c) supervised by a supervisory principal of a U.S. broker-dealer. This Research Report is distributed in the U.S. through Brasil Plural Securities LLC, 545 Madison Avenue, New York 10022.

**GUIDE TO FUNDAMENTAL RESEARCH**

The main methods used to evaluate financial instruments and set a target price for 12 months after the investment recommendation are as follows:

- Discounted cash flow (DCF) model or similar methods such as a dividend discount model (DDM)
- Comparison with market peers, using the most appropriate methods for the individual company analysed: among the main ratios used for industrial sectors are price/ earnings (P/E), EV/EBITDA, EV/EBIT, price /sales.
- Return on capital and multiples of adjusted net book value are the main methods used for banking sector stocks, while for insurance sector stocks return on allocated capital and multiples on net book value and embedded portfolio value are used
- For the utilities sector comparisons are made between expected returns and the return on the regulatory asset base (RAB)

Some of the parameters used in evaluations, such as the risk-free rate and risk premium, are the same for all companies covered, and are updated to reflect market conditions. Currently a risk-free rate of 4.0% and a risk premium of 5.5% are being used.

Frequency of research: quarterly.

Reports on all companies listed on the S&P500 Index, most of those on the MIBEX Index and the main small caps (regular coverage) are published at least once per quarter to comment on results and important newsflow.

A draft copy of each report may be sent to the subject company for its information (without target price and/or recommendations), but unless expressly stated in the text of the report, no changes are made before it is published.

Explanation of our ratings system:

BUY: stock expected to outperform the market by over 25% over a 12 month period;

OUTPERFORM: stock expected to outperform the market by between 10% and 25% over a 12 month period;
